ALFEN

EVBOX

HUAWEI

ETREL

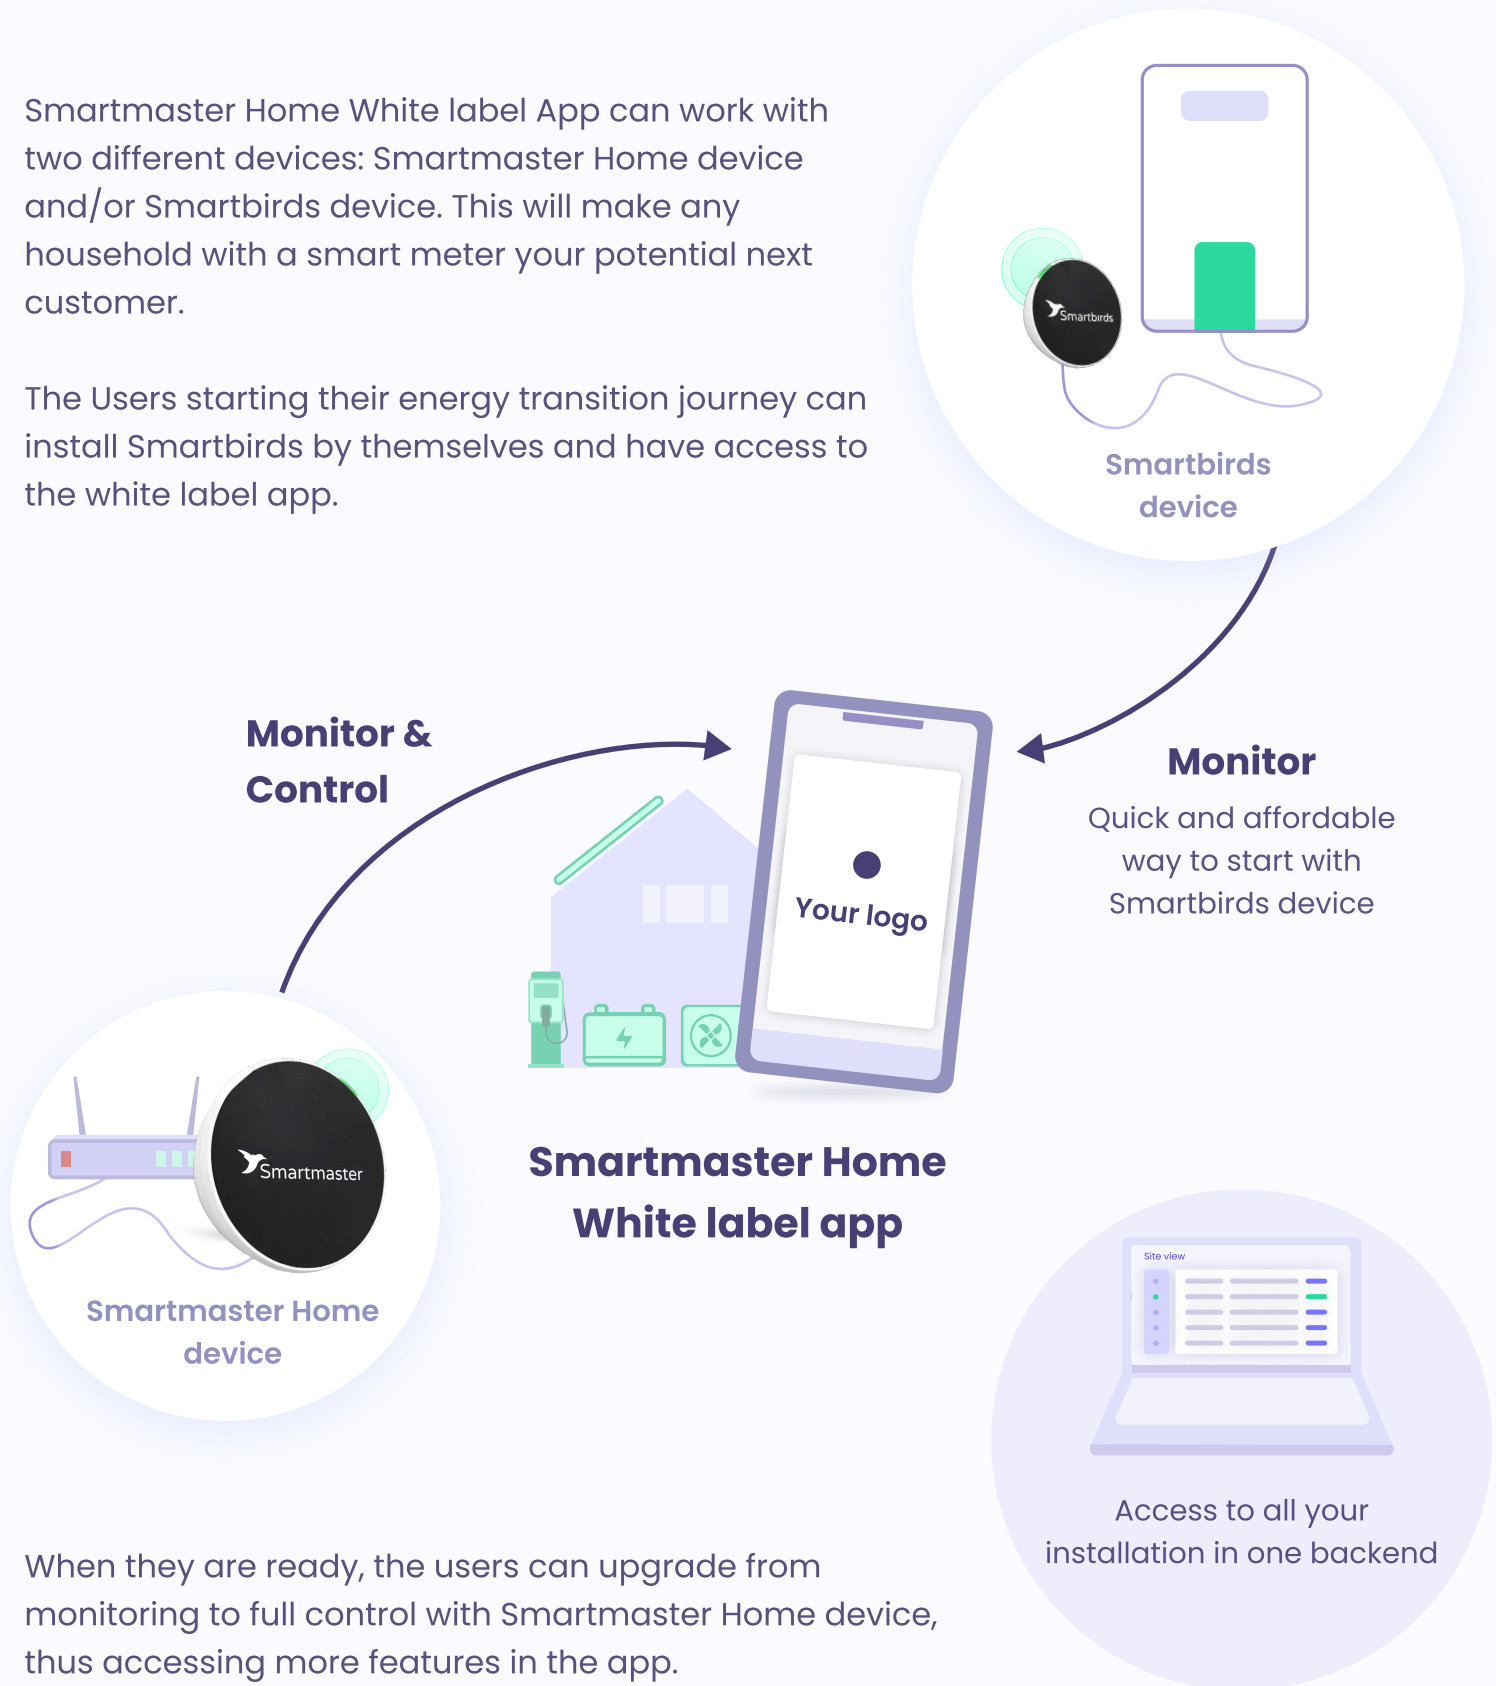

and more ...

Easily grow the number of your customers

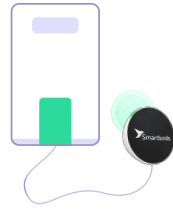

Smartmaster Home White label App can work with two different devices: Smartmaster Home device and/or Smartbirds device. This will make any household with a smart meter your potential next customer.

The Users starting their energy transition journey can install Smartbirds by themselves and have access to the white label app.

When they are ready, the users can upgrade from monitoring to full control with Smartmaster Home device, thus accessing more features in the app.

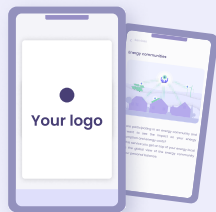

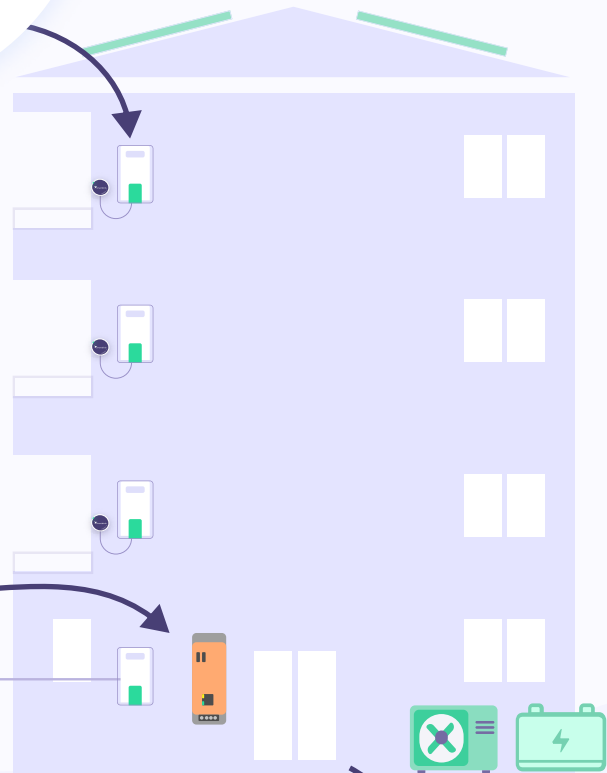

The case of Apartment building

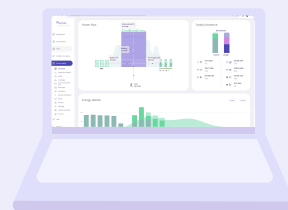

Connect Smartbirds device to the apartments smart meters

Connect Smartmaster Pro device to the site

White label app with possibility of Energy community support for the residents

Dashboard for the Building manager
